+91 9351761009 ◇ Bangalore, IN

dikshitapurohitb@gmail.com ◇ github.com/dikshita-purohit/ ◇ dikshita.artstation/

## PROFESSIONAL SUMMARY

---

Software Engineer with experience in C++, Java, C, and full-stack development, along with hands-on experience building multiplayer games and AI-powered applications. Strong foundation in Object-Oriented Programming, Data Structures, Algorithms, Software Engineering, debugging, testing, and version control. Experienced in developing scalable multiplayer systems, cloud-connected applications, and interactive gaming experiences. Passionate about solving complex problems, writing clean code, and building high-quality software.

## EXPERIENCE

---

### Karma Play Limited

Jul 2025 - Feb 2026 **Multiplayer Game Developer Intern**

- Developed multiplayer gameplay systems in Unity using Coherence Multiplayer for real-time synchronization.
- Designed and implemented modular, maintainable game features using Object-Oriented Programming principles.
- Debugged networking and gameplay issues to improve software reliability and user experience.
- Collaborated with developers and designers to deliver production-ready features in an agile environment.

### Eklavya.me

Nov 2025 - May 2026 **Developer Intern**

- Developed educational applications using React.js, Node.js, JavaScript, and Tailwind CSS.
- Implemented frontend-backend integrations and optimized application performance.
- Participated in debugging, testing, and feature enhancements to improve software quality.
- Worked collaboratively with team members to deliver user-focused software solutions.

### DARKCITY ATELIER

Jan 2026 - Present **Unity Developer Intern**

- Developing multiplayer card game systems using Unity and Photon Fusion.
- Implementing gameplay logic, networking systems, and real-time synchronization features.
- Optimizing software performance through testing, debugging, and code improvements.
- Collaborating with cross-functional teams to deliver scalable multiplayer functionality.

## PROJECTS

---

### 3D Wildlife AR

*C#, Python, Unity, Azure, YOLOv11*

- Led development of a cloud-connected AR application capable of real-time wildlife detection using a trained YOLOv11 model.
- Designed and implemented communication between Unity clients and cloud-based inference services through Azure endpoints. Integrated AI-powered species information retrieval and interactive 3D visualization features.
- Applied software engineering principles to develop a scalable and maintainable application architecture.

### Nightfang: Vampire Hunt

*Unity, C#*

- Developed a **2D vampire shooter game** featuring responsive player controls, enemy AI, collectibles, scoring systems, collision detection, and UI management to create an engaging gameplay experience.
- Implemented core gameplay mechanics including shooting systems, enemy behavior, health management, and collision handling to enable dynamic player-enemy interactions.
- Applied **Object-Oriented Programming** principles to design modular game systems, while testing and debugging gameplay features to improve performance, maintainability, and overall game stability.

## TECHNICAL SKILLS

---

**Programming Languages:** C++, Java, C, C#, JavaScript, Python

**Computer Science Fundamentals:** Object-Oriented Programming (OOP), Data Structures, Algorithms, Problem Solving, Software Engineering Principles, Design Patterns

**Game Development:** Unity, Multiplayer Networking, Photon Fusion, Coherence Multiplayer, Gameplay Programming

**Web Technologies:** React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS

**Tools Platforms:** Git, GitHub, Visual Studio Code, Unity, Postman, Blender

**Software Practices:** Version Control, Testing, Debugging, Code Review, Agile Development

**Relevant Coursework:** Data Structures Algorithms(basics), Object-Oriented Programming, Operating Systems, Database Management Systems, Software Engineering

## AWARDS

---

- **First Place – PROTATVA-2025 State Level Inter Collegiate Project Exhibition** *October 2025*  
RV Institute of Technology and Management in association with IEEE Bangalore Section, for the project “3D Wildlife AR: Augmented Reality-Based Wildlife for Learning”.
- **First Place – National Level Project Expo 2025** *December 2025*  
HKBK College of Engineering, for the project “Wildlife AR”.

## EDUCATION

---

**B.E. in Information Science and Engineering**, HKBK College of Engineering **CGPA: 9.18** 2026  
Bangalore, India
